# JVAM

Founded in 2017, JVAM represents the collaborative fusion of creative designers with renowned footwear factory, Leiner Shoes. As a true artisanal collaboration between designer and maker, at JVAM we integrate modern and modular design principles into the artistry of traditional shoemaking.

The JVAM narrative centres around celebrating the craft of shoemaking to present a collection that pushes the boundaries of product design. Our collection is a product dialogue of balanced contrasts where you will find a harmony of artisanal with modern, a balance of directional with minimalism and the interplay of boldness with subtlety.

Lightweight, flexible and rich in form and function, our products speak for themselves, embodying our principles of meticulous attention to detail, delivering exceptional quality and our commitment to responsible manufacturing. Our focus is on curating unmatched comfort through functional design as we put forth a catalogue that tells the story of conscious craftsmanship.
