

JVAM

COLLECTION / / SS2027

About the Collection

This season we continue our exploration of leather as fabric, manipulating the material through interlacing, knotting, draping and pleating. These techniques introduce texture and movement while reinforcing the qualities that define JVAM – flexibility, comfort and considered design.

Interlaced leather is a key expression throughout the collection, creating lightweight woven structures that allow the foot to breathe, while offering softness, natural flexibility and visual depth. The open latticework of our knot weave takes this idea further, while gathered pleats and elasticated details carry a sense of tension and release. Fluid draped uppers and fringing add movement without compromising on function.

Our heritage in loafers, moccasins and ballerinas remains at the heart of the collection, with familiar silhouettes reworked through this season's language of interlacing, fringing and draping. Alongside, our sandal offering evolves in deliberately contrasting directions. Pod, our two-part EVA footbed construction carries visual weight yet feels almost weightless underfoot. At the other extreme, our pared back super flat sandal retains the care, intentional flex and padding that makes it unmistakably JVAM. Our new platform wedge and heeled sandals extend the elevated offering, broadening the range while remaining true to the brand's emphasis on everyday wearability.

The palette captures the ease of high summer, balancing sun-washed tones with grounded neutrals. Sunlight yellow, leaf green, cloud white and soft blue are anchored by earthy tones of tan, navy and burgundy. Fiery red cuts through as the season's bold accent.
