

TWIST OF TIME

This season we continue our exploration of footwear as an extension of the garment, pushing further into twisted leather as both an aesthetic and functional technique. Used as a design language, the twist creates natural stretch and flexibility – enhancing comfort in our folded and twisted drape sandal and slingback styles. This approach carries through to leather strips folded and repeated to form cage-like, bandage-style uppers – structures that move with the foot, reinforcing our aim to merge flexibility with design.

Unexpected pairings remain a key visual driver, reflecting our ongoing dialogue with balanced contrasts. Vintage style watch straps are redesigned as toe holds – adding the functionality of a stretch element to a layer of visual tension. The same spirit of offbeat tension continues in our molded footbed kitten heels and sweetheart asymmetric double footbed constructions.

We return to our roots with modern loafers reimagined with bold fluid fringing and soft baby calf suedes. The old school and prep worlds get a reboot with our bump toe lasts and super flat chip toe baboosh styles.

Materials this season are refined, cool and elevated. Gone are the hits of metal and in our more grounded hues – from yellow snake and frozen dew white to soft light blue and a fresh, assertive red that punctuates the palette. The micro basket weave comes in to subdue and cool off the heaviness of a full grain in high summer.

Our mission statement remains unchanged: footwear that is flexible, functional, comfortable and modern. *Twist of Time* is our eternal dialogue between design and craft – balancing form and function, with a twist.
